

DEED OF REINSTATEMENT AND VARIATION
NUMBER 1

PARTIES

BUMA Australia Pty Ltd (ACN 649 634 579) of Level 11, 199 Grey Street, South Brisbane QLD 4101
(BUMA AU)

and

PT Bukit Teknologi Digital of South Quarter Tower A Penthouse Floor, UnitA-1, Jl. R.A Kartini Kav 8,
Cilandak Barat, Jakarta Selatan 12430, Indonesia (**Bukit**)

BACKGROUND

- (a) On 25 July 2023, BUMA AU and Bukit executed an Internal Supply Agreement (**Agreement**).
- (b) On 1 July 2025 the Agreement expired. BUMA AU and the Bukit have agreed to reinstate and vary the Agreement in accordance with the terms of this Deed of Reinstatement and Variation, effective from the date of the last signature of this Deed (**Effective Date**).

OPERATIVE PROVISIONS

1. DEFINITIONS AND INTERPRETATION

1.1 Definitions

In this deed, expressions defined in the Agreement and used in this deed have the meaning as set out in the Agreement, unless otherwise defined in this deed.

Interpretation

The rules of interpretation set out in the Agreement apply to this deed.

2. REINSTATEMENT

With effect from the Effective Date, the Parties agree to reinstate the Agreement on the same terms except as varied in accordance with this deed.

3. VARIATION

- (a) The parties enter into this deed to vary the Agreement in accordance with clause 7 of the Agreement.
- (b) With effect from the Effective Date, the Parties agree to the amendments to the Agreement as contained within the Schedule to the deed.
- (c) For the avoidance of doubt, the Parties agree that the terms of the Agreement as in effect prior to the Effective Date continue to apply up to (but excluding) the Effective Date, from which date the varied terms replace the original terms in accordance with clause (b).

GENERAL

Governing law and jurisdiction

- (d) This deed is governed by the relevant jurisdiction stated in clause 2.3 of the Agreement.

Unenforceable provision

If any term, provision or part of this deed is found to be wholly or partly void, invalid or unenforceable, the term, provision or part must, to that extent, will be treated as full severable from this deed. Any such determination does not affect the validity or enforceability of the remaining provisions and the deed which shall continue in full force and effect.

Attorneys

Each attorney (where relevant) who executes this deed states that the attorney has no notice of the revocation of the power of attorney appointing that attorney.

Costs and expenses

Each Party must pay its own legal costs and expenses for the negotiation, preparation and completion of this deed.

Entire agreement

- (e) Subject only to the variation effected by this deed, the [Agreement] remains in full force and effect and will be read and construed, and be enforceable as if the terms of this document were inserted into the [Agreement] by way of addition or substitution (as the case may be).
- (f) Except and expressly provided for in this deed, nothing in this deed affects the [Agreement], or the rights and obligations of the parties under this deed.
- (g) The Parties must continue to perform the [Agreement] as amended by this deed.

Variation

Any variation or amendment of this deed must be in writing and signed by both Parties or by persons authorised to sign for them.

Waiver

A Party may only waive a right under this deed in writing.

Counterparts

This deed may be executed in a number of counterparts. It comprises all the counterparts, taken together.

Electronic Execution

Each party acknowledges and agrees that the other may enter into this deed in electronic form and consent to either or both parties signing the deed electronically, including by counterpart.

Non-reliance

Each Party represents and warrants that it has relied upon its own enquiries in entering into this deed and has not relied on any information provided to it by the other Party.

Executed as a deed

**Signed, sealed and delivered by BUMA
Australia Pty Ltd** in accordance with s 127 of
the *Corporations Act 2001* (Cth) by:

.....
Signature of director

Name of director (print)

SCHEDULE 1 – VARIATION

- (a) All references to “Schedule 2” throughout the Agreement are deleted.
- (b) Clause 2.1 of the Agreement is deleted and replaced with:
- “(a) The services to be performed by Bukit are described in Schedule 3 (Services). Bukit must perform the Services during the Term.*
- (b) The Services must be provided by suitably experienced consultants and will predominantly be performed in Indonesia.*
- (c) All Services must be performed and delivered in English.”*
- (c) Clause 2.2 of the Agreement is deleted and replaced with:
- “(a) This Agreement takes effect on and from 1 January 2026 and, subject to earlier termination, continues until 30 December 2028 (**Term**).”*
- (b) BUMA AU may by notice in writing to Bukit, extend the Term by one year (**Further Term**). Such notice must be given by BUMA AU no later than 20 Business Days prior to the Expiry Date.*
- (c) if BUMA AU extends the Term by the Further Term in accordance with clause 2.2(b), the Expiry Date shall be the date of expiry of the Further Term.*
- (d) Clause 2.2(b) will not apply to any Further Term.”*
- (d) Clause 5.4 of the Agreement is deleted and replaced with:
- “BUMA AU will pay to Bukit the amount specified in the relevant invoice within 30 days of the date the invoice was submitted.”*
- (e) Section 1 of Schedule 1 is removed and replaced with:
- ”For BUMA AU:
Attention: Ben Neill
Email: ben.neill@buma.com.au
Telephone: 1300 286 228
- For Bukit:
Attention: Andreto Tri Gunardi
Email: andreto.tg@bukittechnology.com
Telephone: +62 81 14900300”
- (f) Section 2 of Schedule 1 is removed and replaced with:
- “For BUMA AU: Chief Executive Officer – Barry McKeown
For Bukit: Chief Executive Officer – Chandima Wijekoon]
- (g) Schedule 2 and Schedule 3 of the Agreement are removed and replaced with Annexure A to this Deed of Reinstatement and Variation.

ANNEXURE A

SCHEDULE 3 – SERVICE SUPPORT

1. DEFINITIONS

Unless otherwise expressly defined in this Schedule 3, all terms have the meaning given to them in the Agreement:

Application Suite means IronForms, IronPortal, and Ironlake.

Business Days means a day which is not a Saturday, Sunday or public holiday in Queensland, Australia.

Business Hours means Monday to Friday, 8:00am to 5:00pm Brisbane time, excluding Queensland public holidays.

Defect means a verified failure of the Application Suite to perform in accordance with the approved functional specification, technical design, documented requirements, or agreed acceptance criteria. A Defect may require code correction, configuration adjustment, or other remediation activities to restore the Application Suite to its previously accepted state. Defects do not include issues arising from the following:

- (a) changes in business requirements;
- (b) data or transaction volume growth;
- (c) requests for new functionality or enhancements;
- (d) customer-managed infrastructure;
- (e) third-party systems or services;
- (f) data quality issues;
- (g) user error; or
- (h) unauthorised changes.

Incident means an unplanned interruption or degradation of application services, including partial loss of functionality, performance degradation, or incorrect system behaviour, that impacts the normal use of the supported solution.

Incident Management means the process of handling unplanned interruptions or degradations to the supported services in order to restore normal operations in accordance with the agreed Service Levels (SLAs).

Initial Response means acknowledgement of the Incident and commencement of investigation.

ITSM Tool means Jira Support Desk tool.

Minor Technical Updates means those updates that are limited to configuration changes, small-scale code fixes, dependency updates, or Security Patches that do not materially alter application behaviour, interfaces, or performance characteristics.

Monthly Service Report has the meaning given to that term in section 3.6(a) of this Schedule 3.

Out of Scope has the meaning given to that term in section 6(a) of this Schedule 3.

Recurring Incident means an Incident that:

- (a) has the same or substantially similar underlying root cause as a prior Incident; and
- (b) occurs two (2) or more times within a rolling thirty (30) day period; or
- (c) occurs three (3) or more times within a rolling ninety (90) day period, regardless of priority level.

Regular Maintenance means activities performed on a planned and recurring basis (e.g. monthly or quarterly) as part of standard operational support and not triggered by a specific Incident or variation.

Resolution means permanent remediation of the Incident, including deployment of a fix where required.

Restore means restoration of service to an acceptable operational state, including implementation of an agreed workaround.

Routine Maintenance means low risk corrective or preventative activities that:

- (a) do not introduce new functionality;
- (b) do not require changes to system architecture, data models, or integrations;
- (c) do not require replacement or redesign of end of life or unsupported components; and
- (d) can be implemented using the existing deployment and release processes without a formal variation.

Service Request means a standard operational request that are typically fulfilled with no more than two (2) hours of effect when performed by a suitably skilled and experienced support resource.

Security Patch means updates to libraries, frameworks, dependencies, or platform components that are required to address security vulnerabilities, maintain Bukit's supportability, or preserve the stability and operability of the supported solution but does not include:

- (a) major or version upgrades;
- (b) architectural redesign or re-platforming;
- (c) material refactoring; and
- (d) remediation of technical debt or obsolescence requiring redesign.

Service Levels or **SLAs** means the service levels defined in section 4 of this Schedule 3.

Specification has the meaning given to that term in section 2(a) of this Schedule 3.

2. SUPPORT SERVICES

This Support Requirements Specification (**Specification**) defines the mandatory support obligations, service levels, processes, documentation, interfaces, and commercial arrangements required to support the Project Iron application suite, comprising:

- (a) IronForms;
- (b) IronPortal; and
- (c) IronLake.

3. SCOPE

3.1 Operational Support

- (a) Bukit shall provide to BUMA AU:
 - (i) day-to-day operational application support related to the Application Suite;
 - (ii) troubleshooting of application performance issues and application-layer availability issues within Bukit-managed scope; and
 - (iii) remote monitoring of the software performance, using commercially reasonable efforts to identify any issues that may impact its performance or responsiveness, including monitoring the performance of the software's components and subsystems, such as database queries, web requests, and API calls.

3.2 Incident Management

- (a) Incident Management provided by Bukit shall include:
 - i. logging, tracking, prioritisation, escalation, and resolution of all Incidents using the ITSM Tool;
 - ii. logging all Incidents as a ticket in the ITSM Tool at the time the Incident is first reported, detected, or acknowledged, whether raised by BUMA AU, Bukit, or through automated monitoring;
 - iii. use of the ITSM Tool, which shall be the system of record for Incident Management, SLA measurement, reporting, audit, and governance purposes.
- (b) Bukit shall ensure each Incident ticket records, at a minimum:
 - i. date and time the Incident was logged;
 - ii. assigned priority and severity;
 - iii. description of the Incident and affected application or service;
 - iv. timestamps for response, resolution, and closure; and
 - v. current status and assigned resolver group.
- (c) For the purposes of SLA measurement:
 - i. the SLA response time clock commences when the Incident ticket is logged in the ITSM Tool;
 - ii. the SLA resolution time clock commences at the same time as the response clock unless otherwise specified in the applicable SLA; and
 - iii. the SLA clock stops when service is restored or an agreed workaround is implemented and recorded in the ITSM Tool.
- (d) The SLA clock may be paused only where:
 - i. the Incident is awaiting required information, access, or approval from BUMA AU; or
 - ii. the Incident is dependent on a third party outside Bukit's reasonable control.
- (b) Any pause to the SLA clock must be explicitly recorded by Bukit in the ITSM Tool together with the reason for the pause, and Bukit shall ensure the clock resumes immediately once the blocking condition is removed.

- (c) Bukit must perform root cause analysis (RCA) for:
 - i. all priority 1 (P1) and priority 2 (P2) Incidents; and
 - ii. any Recurring Incident.
- (d) For the purposes of this Agreement:
 - i. P1 and P2 Incidents require automatic RCA; and
 - ii. P3 and P4 Incidents require RCA once the recurrence threshold is met.
- (e) Recurring Incidents shall be treated as high priority for the purposes of RCA, remediation planning, and service performance reporting.
- (f) Bukit shall escalate Incidents to relevant stakeholders in accordance with the agreed escalation procedures and governance framework where required.

3.3 Service Requests

- (a) Handling user requests such as user access, configuration changes, and routine administrative tasks that do not involve code changes. Any data correction request shall be subject to Bukit's review, feasibility, risk assessment, and written approval from an authorized Client representative.
- (b) Bukit shall document all completed service requests in the agreed ITSM Tool

3.4 Maintenance and updates

- (a) Bukit must perform:
 - i. Regular Maintenance and health checks, performed on a scheduled basis, to ensure the continued stability, availability, and performance of the supported solution; and
 - ii. Routine Maintenance, Security Patching, and Minor Technical Updates required to sustain the current supported solution in its existing architecture and functional state.
- (b) For clarity, the following are expressly excluded from Regular Maintenance and Routine Maintenance and shall be treated as enhancements or changes subject to a separate variation:
 - i. major or version upgrades of any application or platform component;
 - ii. architectural changes or refactoring;
 - iii. replacement of unsupported or end-of-life components requiring material redesign;
 - iv. remediation of pre-existing design, architectural, or scalability limitations beyond normal corrective maintenance; and
 - v. new features, functional enhancements, or expansion of scope.

3.5 Security Patches

- (a) Bukit acknowledges and agrees that any Security Patches performed:
 - i. are limited to low-risk technical changes;
 - ii. do not introduce new business functionality;
 - iii. do not materially alter application behaviour, interfaces, or performance characteristics; and
 - iv. are implementable within the existing architecture and deployment processes.
- (b) Bukit must apply Security Patches within the following timeframes, which will be measured from the date the Security Patch is made available by the relevant vendor or authority:
 - i. Critical or high severity vulnerabilities: within thirty (30) days; and
 - ii. Medium severity vulnerabilities: within ninety (90) days.
- (c) If Bukit believes (acting reasonably) that a Security Patch cannot be implemented within the applicable timeframe under clause 3.5(b) due to operational risk, dependency constraints or third party limitations, Bukit must:
 - i. notify BUMA AU as soon as practicable before the expiry of the applicable timeframe and no later than 5 Business Days from the date Bukit becomes aware that it will not be able to implement the Security Patch;
 - ii. provide reasons for the delay and evidence supporting the reasons for the delay; and
 - iii. propose a revised remediation timeframe and the interim risk mitigation measures Bukit will implement until the date Bukit is able to implement the Security Patch.

3.6 Monthly Service Reporting

- (a) Bukit shall provide a written monthly service report, generated from the agreed ITSM Tool, covering the applicable reporting period (**Monthly Service Report**).
- (b) The Monthly Service Report shall include, at a minimum:

- i. Incident summary:
 - i. total number of Incidents logged during the reporting period, categorised by priority (P1–P4);
 - ii. number of Incidents resolved, outstanding, and carried forward;
 - iii. identification of any Recurring Incidents; and
 - iv. summary of P1 and P2 Incidents, including root cause status and remediation actions.
- ii. Service Levels performance:
 - i. SLA compliance results for response and resolution times by priority;
- (c) identification of any SLA breaches, including cause and corrective actions;
- (d) trend analysis comparing current and prior reporting periods; and
- (e) data and findings collected from Bukit in the course of performing its obligations under clause 3.1(a)(iii).
- iii. Key issues and recommendations:
 - i. material risks, recurring themes, or systemic issues identified during the reporting period;
 - ii. recommendations limited to corrective or preventative actions required to restore or sustain the current supported solution; and
 - iii. confirmation of any issues requiring escalation, variations, or commercial consideration.
- (c) The Monthly Service Report shall be delivered by Bukit to BUMA AU within 10 Business Days following the end of each reporting period.
- (d) Bukit acknowledges and agrees that failure to provide the Monthly Service Report in accordance with this section constitutes a failure to meet the Monthly Service Reporting obligation for the reporting period.

4. SERVICE LEVELS

4.1 Priorities Definitions

Priority	Definition
P1 – Critical	Complete loss of production application service with no available workaround, affecting all users within the supported application scope.
P2 – High	A critical application function is unavailable or severely impaired in production with no viable workaround, causing significant business impact to multiple users or a key business process.
P3 – Medium	A non-critical function is impaired, or a critical function is impaired, but a workaround is available, resulting in moderate business impact.
P4 – Low	Minor issue with low business impact, including cosmetic defects, documentation issues, or other non-material problems that do not significantly affect normal operations.

4.2 Support Hours & Engagement Method

Priority	Support Coverage	Primary Engagement Method
P1	8x5 (Brisbane Time)	Phone (via Service Desk)
P2	Business Hours	Phone (via Service Desk)

P3	Business Hours	ITSM / Email
P4	Business Hours	ITSM / Email

4.3 Response, Restore & Resolution Targets

Impact Description	Priority	Initial Response	Restore Target	Final Resolution Target
Services are down	P1	≤ 30 minutes	≤ 4 hours	≤ 14 calendar days
Services operational but severely impaired	P2	≤ 30 minutes	≤ 12 hours	≤ 30 calendar days
Services operational but moderately impaired	P3	≤ 4 Business Hours	≤ 5 Business Days	≤ 45 calendar days
Minor service issues, use can continue	P4	≤ 4 Business Hours	≤ 10 Business Days	≤ 60 calendar days

- (a) Response and Restore SLAs are measured using the agreed ITSM Tool in accordance with the Incident Management section.
- (b) Resolution targets are indicative and may be revised through a variation where permanent remediation requires additional scope or dependency resolution.

4.4 Defect Management

- (a) Bukit acknowledges and agrees that classification of an issue as a Defect will be determined by reference to the approved specifications and acceptance criteria, and shall not be dependent on the effort, complexity, or duration required to remediate the issue.
- (b) For each verified Defect within the supported application scope, Bukit shall provide end-to-end Defect management services, including:
 - i. identification and formal recording of the Defect in the agreed ITSM Tool;
 - ii. ticket logging, tracking, categorisation, and prioritisation;
 - iii. investigation and diagnosis of the Defect;
 - iv. remediation of the Defect, including code correction, configuration adjustment, or other appropriate corrective action required to restore the Application Suite to its previously accepted state;
 - v. validation and, where required, appropriate regression testing prior to release of the fix;
 - vi. communication, deployment, and implementation of the resolution in accordance with the agreed release or support process; and
 - vii. ticket closure following implementation of the resolution, supported by appropriate confirmation and documentation.
- (h) Root cause analysis (RCA) shall be mandatory for:
 - i. all priority 1 (P1) and priority 2 (P2) Defects; and
 - ii. any Defect or Incident classified as a Recurring Incident.
- (c) Each RCA shall:
 - i. identify the underlying root cause;
 - ii. describe corrective actions taken;
 - iii. outline preventative measures to reduce the likelihood of recurrence; and
 - iv. be documented and included in the applicable Monthly Service Report.

4.5 Service Request Fulfilment

- (a) The parties acknowledge and agree that Service Requests are included within the base support services, subject to agreed support capacity and reasonable fair use.

- (b) Service Requests may include, by way of example, user access requests, configuration changes, and routine administrative tasks, provided that such requests:
 - i. do not involve code changes;
 - ii. do not introduce new functionality;
 - iii. do not materially alter application behaviour, architecture, or performance; and
 - iv. do not involve production data correction without prior written approval.
- (c) Requests involving code changes, production data correction, elevated operational risk, or materially exceeding the indicative effort threshold shall be classified as variations and shall be subject to separate review, approval, and commercial agreement.
- (d) Bukit shall log, document, track and report monthly all Service Requests using the ITSM Tool.

4.6 Release & Deployment Management

Bukit shall:

- (a) maintain Bukit-managed CI/CD pipelines and deployment processes for the supported application scope, aligned where applicable with agreed environment standards;
- (b) perform appropriate regression testing prior to release;
- (c) provide release notes and relevant functional or technical change logs;
- (d) support and coordinate release approvals and CAB submissions with BUMA AU; and
- (e) apply reasonable deployment risk mitigation measures, including back-out, remediation, or recovery actions where appropriate to the nature of the deployment

4.7 Documentation Requirements

- (a) Bukit shall maintain documentation reasonably required to support the ongoing operation and maintenance of the supported application scope, including, where applicable:
 - (i) high-level architecture diagrams;
 - (ii) Bukit-managed application configuration documentation;
 - (iii) API specifications;
 - (iv) release notes and version history;
 - (v) support runbooks;
 - (vi) user or administrator guidance affected by material changes; and
 - (vii) test cases & regression suites
- (b) Documentation updates shall apply only to artifacts materially impacted by Bukit-delivered releases or supported changes.
- (c) Relevant documentation updates shall be completed by Bukit within ten (10) Business Days where practicable.

4.8 Environment Support

Bukit shall provide application-level support for the User Acceptance Testing (UAT) and production environments within the supported application scope, including:

- (a) application deployment and configuration support;
- (b) troubleshooting of application-layer issues;
- (c) support of agreed data refresh activities for UAT and production environments;
- (d) application-level monitoring support; and
- (e) application-level access and authorization configuration.

4.9 Reporting Requirements

- (a) Bukit shall produce a written Monthly Service Report for each reporting period, generated from the ITSM Tool.
- (b) The Monthly Service Report shall include:
 - (i) Incident and Service Request volumes, categorised by type, priority, and severity;
 - (ii) Service Level performance results, including response, restore, and resolution compliance by priority;
 - (iii) Identification and analysis of Recurring Incidents and Defects;

- (iv) Defect status summary, including Defects opened, resolved, outstanding, and carried forward;
- (v) Summary of approved variations executed during the reporting period;
- (vi) root cause analysis (RCA) summaries for all P1 and P2 Incidents and Defects, and any Recurring Incidents;
- (vii) Key risks, issues, and corrective or preventative recommendations limited to sustaining the current supported solution,
- (viii) and any other requirements requested by BUMA AU from time to time.

(c) The Monthly Service Report shall be delivered within the agreed reporting timeframe.

4.10 Governance Requirements

- (a) Bukit shall participate in the following governance activities:
 - (i) monthly operational governance meeting to review service performance, incidents, defects, SLAs, and risks;
 - (ii) quarterly service performance review to assess trends, recurring issues, and improvement actions;
 - (iii) annual strategic roadmap review, limited to alignment of support services with the existing supported solution;
 - (iv) participation in audit activities reasonably required by BUMA AU, subject to agreed notice and scope; and
 - (v) participation in business continuity and disaster recovery exercises relevant to the supported services, where required.
- (b) Governance activities shall be supported by the Monthly Service Report and associated ITSM data.

4.11 Assumptions & Constraints

- (a) The following assumptions and constraints apply to the provision of support services:
 - (i) all services are delivered within the BUMA AU Azure environment;
 - (ii) Bukit must comply with all applicable BUMA AU cyber security, information security, and access control policies;
 - (iii) Without limiting the operation of clause 10 of the Agreement, BUMA AU retains full ownership of all intellectual property associated with the Application Suite; and
 - (iv) Bukit's personnel must meet BUMA AU onboarding, access, and compliance requirements prior to performing services
- (b) Any deviation from these assumptions or constraints shall be subject to prior written agreement.

4A SERVICE KPIS

Bukit and BUMA AU will be required to complete the following KPI table quarterly, including any justification for non-conformance or partial conformance. This review is to ensure that the KPIs remain appropriate (e.g. maintaining a balance of ensuring the targets are not unachievable or too easily achievable). Any changes to the KPIs will be mutually agreed between the parties.

Incident Response Time	Time taken by the Bukit support team to respond to a reported Incident.	2		Critical: < 30 min response time. All other: < 4 hour response time.
Escalation Rate	The percentage of incidents that need to be escalated to higher levels of support.	2		< 5% escalation rate.

Mean Time to Repair (MTTR)	The average time taken to resolve an Incident.	2		Critical: < 2 hours All other: < 8 hours
Knowledge Management	The accuracy and completeness of the knowledge base used by the support team to resolve incidents.	2		> 95% accuracy AND > 95% completeness.
Change Management	The percentage of changes to the software that are implemented successfully without any impact on service.	2		> 99% successful changes.
Monthly Service Reporting	Preparation and submission of Monthly Service Reports in accordance with section 3.6 of this Schedule 3.	2		100% produced and provided to BUMA AU

Rating Categories:

- 0 - Non-compliant, nothing completed.
- 1 - Poor, show cause as to why (eg things half done, poor effort, etc).
- 2 - Satisfactory, KPI target met.
- 3 - Excellent, above and beyond what was required.

5. SUPPORT COVERAGE

- (a) Support services apply to the Application Suite.
- (b) Support hours and coverage windows are as defined in section 4 of this Schedule 3, including any priority-specific exceptions.
- (c) The support model is remote support only, unless otherwise agreed in writing.
- (d) On-site support, extended hours, or additional coverage shall be subject to separate agreement and fees.

6. OUT OF SCOPE

- (a) Bukit shall not perform any Out of Scope services unless separately agreed in writing through an approved variation or other written agreement executed by BUMA AU.
- (b) Out of Scope services may be subject to additional fees, revised timelines, and resource availability, as agreed through the applicable variation or written agreement.
- (c) Without limitation, Out of Scope items include:
 - i. new features, enhancements (other than to enhancements require to fix issues with pre-existing features), or additional business functionality;
 - ii. major or version upgrades, architectural redesign, re-platforming, or material refactoring (this excludes ongoing software updates that may be required to fix bugs, errors, or other issues within the Application Suite);

- iii. infrastructure, network, database, cloud platform, or development environment support not explicitly included in the Bukit -managed application scope;
 - iv. customer-managed identity, security, or access platform administration outside the supported application layer;
 - v. bulk data correction, historical data remediation, or data migration not expressly included in scope;
 - vi. user training, business process redesign, organisational change management, or adoption activities;
 - vii. third-party system changes or third-party remediation, except for reasonable support coordination; and
 - viii. any Service Request, activity, or remediation effort that exceeds the agreed scope, indicative effort thresholds, or support capacity.
- (d) For avoidance of doubt, Bukit commence any Out of Scope services without prior written approval from BUMA AU. BUMA is not liable to pay Bukit, and Bukit is not entitled to invoice BUMA AU, for any Out of Scope services performed by Bukit without the express prior written approval of BUMA AU.

7. COMMERCIAL REQUIREMENTS

7.1 Charging Model

- (a) BUMA AU will pay Bukit for Bukit's delivery of the support services outlined in the Specification a total amount of AUD 147,747 (exclusive of GST) for the period commencing 1 January 2026 and ending 31 December 2026. Bukit may invoice BUMA quarterly in advance in four (4) equal instalments of AUD 36,936.75 (exclusive of GST), with invoices submitted on or after 1 January, 1 April, 1 July and 1 October of each year, and payment shall be made in accordance with clause 5 of the Agreement.
- (b) In addition to the requirements in clause 5.2 of the Agreement, all invoices must be supported by detailed ticket logs and an hour or effort breakdown extracted from the ITSM Tool.
- (c) BUMA AU reserves the right to dispute, withhold, or reject invoices that do not contain sufficient supporting evidence.
- (d) Where Bukit fails to meet one or more applicable Service Levels during a reporting period, BUMA may, acting reasonably:
- i. withhold payment of the affected invoice in whole or in part; or
 - ii. require remediation of the Service Level failure prior to invoice approval.
- (e) If Bukit fails to implement, to BUMA AU's reasonable satisfaction, an agreed remedial action plan developed in accordance with clause 8(b)(i) of the Agreement following the non-achievement of one or more Service KPIs in two successive quarters, BUMA AU may, pursuant to clause 8(b)(ii) of the Agreement, apply a service credit (payable to BUMA AU but may be offset against amounts owing to Bukit) equal to 3% of the value of each invoice submitted by Bukit until such time as Bukit demonstrates compliance with the applicable Service KPIs at a quarterly performance review.
